Sobre el libro, leemos esto en Amazon (<https://www.amazon.com/-/es/Edward-Hull/dp/078582782X>):

The *TimeChart* is based on an original Victorian wall chart, published in 1890, *el diseño original es de Edward Hull (1829-1917)*. It follows the entire history of mankind and shows what was happening concurrently around the world with illustrations of many major events, discoveries and prominent people. While maintaining the Victorian design, the chart has been updated and extended so that the time stream continues into the twenty first century, right up to the present day.

There are maps and charts, and on the reverse of the *TimeChart* there is a vast store of extra information on the different nations' rulers and dynasties. Although it is impossible to show everything that has happened in history on one poster, this one shows the rise and fall of the great empires and nations throughout history, from 3000BC to 2000AD. It is arranged by continent, and where possible, continents that are next to each other on the globe are next to each other on the chart, and each continent has a limited colour range, making it easily identifiable. Beneath the main chart is a timeline of important events and personalities in the past, including kings and queens, politicians, religious and cultural leaders and inventors.
